

BVLGARI

HOTEL AMENITIES COLLECTION

THE BVLGARI HOSPITALITY STATEMENT

Rooted in Bvlgari's Italian Art of Living, our amenities are conceived for the world's most refined hotels, resorts, cruises and airlines.

Translating the Maison's devotion to beauty and excellence into moments of everyday ritual, they embody the same meticulous attention to detail that defines our jewelry creations.

Like precious gems, exceptional ingredients are carefully selected, artfully combined and expertly chiselled to reveal their full sensorial potential. Encased in elegant packaging, each creation reflects Bvlgari's pursuit of perfection, from formula to finish.

An experience that elevates every stay and journey, lingering long after the moment has passed.

Eau Parfumée A BVLGARI OLFACTORY ICON

Eau Parfumée au Thé Vert was launched in 1992 and designed as an exclusive gift, aiming to cater to the close circle of the Maison's top High Jewelry clients.

The perfume was truly groundbreaking. For the first time, it recreated the scent of tea in a gender-neutral olfactory signature. It came in an unexpected 350 ml flacon, adorned with the iconic glass décolleté, symbolizing a sensory experience as rich and intimate as wearing a jewelry creation.

In 2003, Bvlgari decided to enrich the Eau Parfumée collection. Jacques Cavallier patiently chiseled his personal interpretation of tea, creating the refined and elegant Eau Parfumée au Thé Blanc.

Today, to acknowledge the contemporary appeal of the Eau Parfumée experience and celebrate its long-lasting success, Bvlgari invites its clients to rediscover its original perfume creation through a new design, a revisited formula with natural tea, and a new conceptual story.

THE AMENITIES COLLECTION

THE SIGNATURE FORMULAS

Traveling the world in search of the most precious essences, Bvlgari has created a collection of exclusive luxury amenities inspired by the Maison' signature scent of tea. Dedicated to those who seek unique moments of pure bliss, the Bvlgari amenities collection offers the ultimate sensory journey, promising each guest a memorable and indulgent experience.

The collection features a range of carefully crafted creations, bringing a distinctive texture and sensory quality. The body shower gels, for instance, become a smooth and voluptuous lather on contact with water, delicately cleansing the body while leaving the skin soft and comfortable. Similarly, the lightweight body lotions glide effortlessly over the skin, replenishing moisture. Their fluid texture forms a smooth, velvety veil that absorbs quickly.

Throughout the collection, these harmonies of texture, scent, and sensation invite an immersive experience, where every product evokes quiet elegance and refined luxury.

THE NEW BVLGARI PATENTED DISPENSER

Bulgari introduces a new 400 ml dispenser, exclusively designed for the world of hospitality. The system relies on an innovative replacement-bottle technology that enhances hygiene by integrating the inner dip tube, effectively reducing the risk of bulk contamination when replacing the pump. This new technology is patented by Bvlgari*.

Key features of the new 400 ml dispenser include:

Larger Format: the dispenser features a resin cover with an aluminum label, which indicates the scent and product description, along with a 400 ml replacement bottle and a reusable pump.

Reduced Material Usage: The 400 ml replacement bottle uses only 16 grs of recycled PET and 9 grs of plastic for the funnel, compared to 32 grs (pump excluded) for the previous Bvlgari Hotel Line 300 ml dispenser.

Pump Reusability: The pump for the 400 ml dispenser can be reused for up to a year (approximately 12 reuses), thanks to the funnel system that reduces the risk of bulk contamination when the pump is replaced. This reduces the consumption of packaging materials and waste.

Significant Weight Reduction: The resin cover has a recommended service life of two years. During this period, the system allows for an average of 24 reuses. The total weight of the system over 24 months (24 replacement bottles, 2 pumps, and 1 cover) is 1028 grs, making it much lighter than the 300 ml dispenser, which requires 1440 grs of material over the same period, representing a 28% reduction in packaging weight.

Full Recyclability: The 400 ml replacement bottle is compatible with recycling streams available in Europe, ensuring proper end-of-life disposal and material recovery.

EAU PARFUMÉE THÉ VERT

AMENITIES COLLECTION

Eau Parfumée THÉ VERT

Eau Parfumée Thé Vert is the Bvlgari's precious olfactive signature crafted by master perfumer Jean-Claude Ellena encapsulating the revitalizing olfactive botanical properties of green tea.

The fragrance captures the irresistible vitality of the young tea leaves as well as their vegetal, grassy and refreshing aroma. The signature citrus aromatic skillfully combines green tea notes with a luminous floral accord of neroli petals.

The fizzy texture of bergamot essence mingles with crispy, young tea leaves to recreate the timeless, rejuvenating pleasure of being immersed in nature, imbuing all the senses with new energy.

Key Olfactive Notes

Neroli Petals Accord & Green Tea Extract

Natural Origin Ingredients

Our Bvlgari Eau Parfumée Thé Vert formulas contain at least 86% of ingredients of natural origin*.

EAU PARFUMÉE THÉ BLANC

AMENITIES COLLECTION

Eau Parfumée THÉ BLANC

Eau Parfumée Thé Blanc is a precious olfactive signature crafted by master perfumer Jacques Cavallier encapsulating the comforting olfactive botanical properties of white tea from China.

The fragrance captures the feeling of comfort offered by the most prestigious Chinese white teas in a woody floral musk fragrance that envelops the soul in a delicate cocoon of confidence and serenity.

The exquisite white tea notes find their perfect alliance in a luminous accord of white musk, the olfactory signature of Bvlgari. The sensual, round, and clean accents of musk create a caressing effect.

Key Olfactive Notes

China White Tea SFE* Extract & White Musks Accord

Natural Origin Ingredients

Our Bvlgari Eau Parfumée Thé Blanc formulas contain at least 87% of ingredients of natural origin**.

* SFE: Supercritical Fluid Extraction. A cutting-edge CO₂ extraction technique that preserves the pure, pod-like aroma in its most authentic form.

This low temperature method, preserves the natural profile of the raw material, capturing all its nuances.

** Excluding solid soap. Amount calculated based on ISO 16128. Water content included. The remaining % helps optimize the formula's integrity and sensoriality.
